

...and considered in the agreement of most participants, ... stakeholder participation and ... decisions. General agreement is achieved on every issue. The Project is used to solve the problem forward in consensus cannot be achieved.

3. Problem Statement

### Problem Statement Development

#### What is a Problem Statement?

- Summarizes the issues and concerns within the project area
- States the important aspects of the project area
- Provides focus in developing the detailed Purpose and Need Statement

Blank whiteboard with faint text.

Blue flipchart with text.

Meeting room with several people seated around tables. A woman is standing and presenting. There are laptops, papers, and water bottles on the tables. The room has a red pillar and decorative wall art.

GENERAL AGREEMENT

Everyone's voice is heard and considered in the process, seeking an agreement of most participants. The intent is to maximize stakeholder participation and ownership of project decisions. General agreement may or may not be achieved on every issue. The Project Study Group may elect to move the process forward in instances where consensus cannot be achieved.

GROUND RULES

The purpose of the Stakeholder Consultation Process is to gather and understand input from all project stakeholders to ensure the project is designed to meet their needs. All input from all participants in the process is valued and considered. All participants agree to be open and honest in their comments, questions, and concerns. All participants agree to be respectful of each other's time and input. The Project Study Group will meet on a regular basis to discuss and address the input received. The Project Study Group will provide a summary of the input received and the actions that will be taken to address the input received. The Project Study Group will provide a summary of the input received and the actions that will be taken to address the input received.
